

DIARY NOTES

DD/S

21 April 1971

1. Demonstrations: I talked to Mr. Osborn about the report that petitions are being circulated in local high schools. He confirmed that the police authorities are aware of this fact and also identified that the current effort is to recruit high school and intermediate school students to join the May Day Collective "March" to CIA on 28 April. Both Arlington and Fairfax County schools are being approached by representatives of the May Day Collective.

I advised Mr. Osborn that Mr. Goodwin is the Agency "official" who is to receive, but without comment, any document which a group such as the May Day Collective might wish to present at the Agency gate. This decision was made at the 21 April Morning Meeting.

25X1A Mr. Osborn and [REDACTED] came in to discuss a seemingly embarrassing position for the Agency vis-a-vis Justice concerning U. S. Marshals. Apparently the U. S. Marshal's office had interpreted Agency discussion as a positive requirement for 40 or 50 marshals. Calls earlier on 21 April indicated that marshals were being brought in from outside the Washington area and asked where we expected to billet them upon arrival. We reviewed all the conversations and agreed that we had a misunderstanding. [REDACTED] then telephoned Mr. Hall and having determined that the marshals are only on alert said that we believe that none should be moved until we specifically request such assistance. 25X1A Mr. Hall stated that 24 hours' lead time is needed. [REDACTED] confirmed that if we order marshals in we will defray their travel and other expenses.

2. C&P Survey: I asked [REDACTED] LSD, if any conclusion had been reached regarding the C&P survey of what we have entering the compound overhead and underground. [REDACTED] said that the review with O/C produced the view that the Agency has adequate capacity underground to carry on even if all overhead circuits are lost. 25X1A
